Patient Denied Financing

If a patient gets denied on our financing options or can't pay in full with credit card/check, there is 1 additional company we can use called Healthcare Financing of America (HFA). HFA approves all applicants without any hard hit on their credit score. While the provider still gets paid in full, they are responsible for recourse should the patient discontinue making payments. In this scenario, HYD still collects their whole fee upfront, and will refund you a portion of any services that have not already been rendered to the patient. You can learn more about this program here: <https://hfaloan.com/providers/>

- No, I don't want to use HFA option
- Yes, I want to use HFA option, and here is the login to my provider portal
